

# For all your Soil and Plant Nutrition Needs

## SEABIRD GUANO

We are the sole importers to Australia and New Zealand of this unique fertiliser

Using a natural product rich in phosphate and numerous trace elements will benefit your soil and the environment. Our Seabird Guano is non - leachable so it stays in your soil, even if it is sandy

The application rate is at least half that of single super phosphate and similar rate to MAP/DAP. Guano has additional trace elements, this product really provides you outstanding value.

MANAGEMENT  
SYSTEMS**

*for all your soil and plant nutrition needs*

Described as  
"The most mineral rich  
fertiliser known to man"

Treat your Soil  
As a  
Living Environment

## Indicative Chemical Analysis

### PROVEN RESULTS

Phosphate (P 205)	24% -25.5%
Total Phosphorus	11.9%
Organic Carbon	10.00%
Potassium	0.16%
Silica	7.6%
Nitrogen	2.74%
Sulphur	2.4%
Calcium	27.5%
Magnesium	1.9%
Sodium	0.08%
Manganese	22273 mg/kg
Zinc	2597 mg/kg
Copper	522 mg/kg
Iron	24399 mg/kg
Boron	42.4 mg/kg
Colbolt	13.4 mg/kg
Molybdenum	5.35 mg/kg

SMS Guano is a Premium Granulated Fertiliser and depending on requirements can be blended with Ammonium Sulphur, Potassium Sulphate, Elemental Sulphur or any other product to meet a certain analysis

"Balanced Nutrition"

# SEABIRD GUANO PHOSPHATE FERTILISER

- Phosphorus 12%
- Calcium 27%
- Organic Carbon 10%
- High levels of Trace Elements

Very cost effective with  
a spreading rate of  
50-200 kg/ha depending  
on what is being grown

TESTIMONIAL FROM DR. ASHLEY MARTIN  
MICROBIOLOGY LABORATORIES AUSTRALIA

"SMS Guano performed as good as or better than the most common conventional fertilisers containing phosphorus in terms of yield, biomass and some measures of beneficial soil microbes in our Standardised Product Evaluation programme, which compares inputs in a scientifically rigorous and very precise way."

#### Disclaimer

As for any Phosphate mine there are wide variations in analysis within the mine. Mining Guano is no different. At Soil Management Systems, we specify a minimum analysis of P<sub>2</sub>O<sub>5</sub> of 24%. Shipments have ranged from each side of this level similar to all phosphate fertilisers. Every shipment has a certified Certificate of Analysis from accredited laboratories. The Certificate of Analysis to the import destination is available upon request. Individual despatches from our warehouses can vary in phosphorus and trace element levels. Soil Management Systems accepts no responsibility for these variations. The buyer accepts and uses this product subject to these variations.
